

AIR TREATMENT VALVES AND UNITS FOR UL- AND CSA-APPROVED COILS

The following air treatment valves and units come in a version for use with UL- and CSA-approved coils.

- Series 70 valves, sizes 1/8", 1/4" and 1/2"
- Series 70 valves on base
- Namur valves
- ISO 5599/1 valves, sizes 1 and 2
- ISO 5599/1 valves with in-line pilot
- Skillair® VAP, APR and V3V

UL certification refers to the coil system and pilot; CSA certification refers to the coil only.

NOTES

UL is an independent organisation involved in the safety certification of products for the North American market. Coils and solenoid pilots are certified under UL 429 - Electrically operated valves.

The UR mark concerns UL-recognised components and is used for ones that are part of a larger product or system. This is why UR can be read on the coil. The certification of these components is only valid if they are used in the manufacturer's stated conditions (in our case voltage $\pm 10\%$ etc.).

The company that manufactures the certified components is included in a UL-listing of certified manufacturers. The list does not include the name Metal Work, but rather the name Nass Magnet (UL file: MH13513), with which we have an agreement for the supply and customisation of coils and solenoid valves.

The use of approved coils and pilots does not automatically certify the whole valve or unit, nor application of a specific machine or plant. Such approval will therefore be up to the manufacturer of the machine or plant.

CSA (Canadian Standard Association) safety standards are applicable in Canada. The coil complies with CSA 22.2.

The valves and units on which these coils can be mounted have the same code and description as those of the corresponding standard valves, followed by the suffix "L".

Example:

	STANDARD VERSION	APPROVED VERSION
Code	7020020400	7020020400 L
Description	SOV 33 SOS NO	SOV 33 SOS NO L

All valves and units of this type have a painted or anodized aluminium control and can only mount Metal Work coils having a code that begins with **W0217** (approved coil).

For the technical data, a diagram of the components and the code key, please refer to the section in the catalogue of the corresponding family of standard valves or units.

UL AND CSA COILS

- Voltage tolerance: $\pm 10\%$
- Insulation class: F155
- Degree of protection: IP65 EN60529 with connector
- Avoid prolonged exposure to the atmospheric agents
- Temperature range:
 - from $+20^{\circ}\text{C}$ at $+50^{\circ}\text{C}$ (DC version)
 - from $+20^{\circ}\text{C}$ at $+40^{\circ}\text{C}$ (AC version)
 - from $+58^{\circ}\text{C}$ at $+20^{\circ}\text{C}$ (DC version)
 - from $+81^{\circ}\text{C}$ at $+20^{\circ}\text{C}$ (AC version)
- Max coil temperature at ED 100%:

Nominal voltage	Absorption	Abbrev.	Code
12Vcc	2.9 W	Bobina 22 Ø9 2,9W 12VDC UR	W0217000151
24Vcc	2.6 W	Bobina 22 Ø9 2,6W 24VDC UR	W0217000101
24V 50Hz	6VA	Bobina 22 Ø9 6/4.9 VA 24V 50/60Hz UR	W0217000111
24V 60Hz	4.9VA		
110V 50Hz	6 VA	Bobina 22 Ø9 6/4.9 VA 110V 50/60Hz UR	W0217000121
110V 60 HZ	4.9 VA		
48 Vcc	2.7 VA		
230V 50Hz	6 VA	Bobina 22 Ø9 6/4.9 VA 230V 50/60Hz UR	W0217000131
230V 60HZ	4.9 VA		

UR-marked coils are therefore components that can form part of a larger product of system. **Approval of the component is valid in the above operating conditions only.**

The coils must be mounted on suitable air treatment valves or units, ones for which the Metal Work code ends with L.
