

VALVES MINIMACH

Space-saving valve, ideal for in industrial automation applications.

Made according to the well-proven design of the Mach series, the Minimach has a painted aluminium body to ensure extra sturdiness and reliable operation in even the harshest of environments.

The internal seals are made of FKM/FPM and are compatible with all oils used in compressors. The pneumatic couplings are M5 threaded, allowing the user to choose the diameter, type and angle of the fitting. The valve can be mounted in line or on a panel or multiple-port base.

The following versions are available:

- 3/2 normally open or normally closed
 - 5/2 monostable or bistable
 - 5/3 closed centres, open centres, pressure centres.
- Electropneumatic actuation with a 24V DC pilot.

HOW TO FIX THE VALVE TO THE BASE

Proceed as follows:

1. screw the pins onto the valve;
2. secure them with the ready-mounted grub screws on the base (max. 0.5 Nm max)

IMPORTANT

To secure properly, press the valve down onto the base while tightening the two grub screws. Do not tighten one grub screw completely before starting to tighten the other.

HOW TO FIX THE BASE

A – From the top using M4 screws

B – From below using M5 screws

C – From the side using M4 screws

D – From the top on the DIN bar via the M4 screws and bracket code 0225004600 (using 1 screw per bracket)
